

Edmonton Bulletin.

VOL. XVI. No. 64.

EDMONTON, ALBERTA, MONDAY, JUNE 11TH, 1894.

SEMI-WEEKLY, 4 PAGES.

TELEGRAPHIC.

WINNIPEG, June 11.

Battle in Brazil is again reported.
Wife of carman Gaudaur is dead.
Chief Justice Colridge is very low.
Wheat continues increasing in price.
Caymo, Kansas, had a \$30,000 fire on Saturday.
Bill Dalton, a notorious Texas outlaw, was shot dead.
An Australian woman poisoned four of her children.
Gould Bros., at Uxbridge, Ont., was robbed of \$4,000.
Bow river is falling and British Columbia floods are subsiding.
Town of Kaslo, B. C., is reported wiped out by a cloud bursting.
Ohio Militia in camp were fired upon from ambush, but nobody was hurt.
A fatal conflict between deputies and strikers occurred in Pennsylvania Coke region on Saturday.
Reported that a shortage of \$6,000 has been found in the funds of the Anglican synod Qu'Appelle. Henry Fisher is treasurer.
Fort Gibson, Indian Territory, railway station and express office were robbed of all cash and valuables, by masked men, on Saturday night.
C. P. R. express which left Fort William for Winnipeg, ran into a burning bridge over the Mattawan river. The engine and four cars ran into the break. The cars, together with mails, baggage and express freight, were totally destroyed by fire. One woman, Mrs. Barker of Hochelaga, and express messenger, Mort Brown, were killed and seven other persons injured.

LOCAL.

MUD!
TRAIN ON TIME.
STRAWBERRIES are ripe.
JAMES PRICE, Belmont, has peas in blossom.
THE Northwest is expected to arrive this evening from the coal mine.
JAS. WALSH purchased a lot of fur from J. A. McDougall, for \$438.75.
F. OLIVER was at Victoria on Saturday and started for Beaver Lake yesterday.
REV. GEO. T. BLEWITT arrived from Calgary to take temporary charge of the Methodist church.
W. MORTIMER has frame cucumbers 6 inches in length, and tomato plants set out, 15 inches in height.
At a recent meeting of the Edmonton Electric Light Co., held in the secretary's office, it was decided to enlarge the plant.
MR. E. DEAN, lately from Ontario is building a fine residence on his farm at Poplar Lake. J. McLin, contractor.
The Sheriff returned from Winnipeg on Thursday's train; having handed over Sheppard to the Warden of the Manitoba Penitentiary.
MRS. JOHN ROSS will return, by "North-west," to Saddle Lake. Mrs. Mann of Onion Lake Indian agency, and Mrs. Lake will also return home by steamer.
The crops east of Regina are looking burnt up, but at Calgary vegetation is well advanced, while the country along the line of the C. & E. is looking splendid.
W. B. STENNETT returned on Thursday evening from Lake St. Ann's. He purchased two lots of fur. One from Pierre Gray for \$2,480, and a small lot of \$146.
DR. WILSON, W. S. Edmonston, T. W. Chalmers, Alex. Taylor and C. D. T. Beecher accompanied the "Northwest" on her trip to the coal mine, and will return by skill.
The auction sale at the Raymond Hotel on Saturday was well attended, but owing to the high reserve prices put on the articles Messrs Milne & Turnbull were unable to dispose of but little of the effects advertised. After the close of the auction some things were purchased at private sale.
INSPECTOR SNYDER reports that the patrol, sent to Stony Plain, to enquire into the disease of "Black Leg," has returned and that no case has been traced. Two cows died from the effects of calving, but the farmers who were interviewed disclaim any knowledge of black leg among the cattle.
At a meeting of the management committee of the Edmonton Athletic Club, held in the Queen's hotel, on Saturday evening, R. Vance was appointed starter; Messrs McCauley, R. Hawkins and Walsh were chosen as judges in horse racing; H. C. Taylor and Al. Patterson judges in athletic competitions.
A MEETING of the St. Jean Baptiste Society was held in the C. M. B. A. building on Sunday. Mr. George Roy in the chair. The committee handed in their reports. The programme for the celebration on the 25th June was partly arranged. A picnic will be held on the flat, on Donald Ross estate. A dance will be given during the evening in Robertson Hall. The committee will hold another meeting to-morrow.
PASTOR A. McDONALD took his wife's niece, Miss S. T. James, to the Medicine Hat hospital, last week. Miss James has been in a poor state of health for four or five years; during the last few months she has been confined to her room, and much of the time to her bed. Her medical advisers thought that the skill and attendance afforded in a well conducted hospital would be beneficial, hence her removal to Medicine Hat.
W. S. ROBERTSON, who has not been to Winnipeg for seven years, says: "I was fairly astonished to see the manner in which that city has grown since my last visit, not so much at the improvements on the Main Street and business parts, but at the substantial manner in which the residential portion of the town has expanded. The magnificent houses of fine architecture and the manner in which the premises and surroundings are laid out, surely are signs of success and prosperity, indicating that Winnipeg is destined some day to be a great city."

WM. EASTON is building a residence 16x20, one and a half storeys, on lot 35, R. L. 8.
THE Sim Fax company are about to visit Edmonton, and will give entertainments on the 19th and 20th inst. in Robertson's hall.
PARTIES taking tickets for points west of Calgary do so at their own risk, as the C. P. R. will not guarantee passage beyond that point.
DURING the thunder storm on Wednesday night John Fraser had a cow killed by lightning, John Borwick also lost a steer from the same cause.
ROBERT RACE was brought up on Saturday afternoon, before Inspector Snyder, N. W. M. P. charged with assaulting A. L. Bown. Fined \$1.00 and costs.

WILLIAMS' EXAMINATION.

Rance Williams was brought up before J. A. McDougall, J. P., charged with the murder of Geo. Steve. N. D. Beck, Q. C. appeared for the crown and A. Prince for the prisoner.
Constable Cowan sworn: In consequence of information received I went down to a place 14 miles below Fort Saskatchewan on the south bank of the river to the top of the cut bank where there is a mining bar in front. A man named Theodore Peters was with me. Two other men, Nixon Ford and George Brodick, came there while I was there. I found there a depression in the ground as if a hole had been dug. The land had sunk about 3 inches below the level of the surrounding surface. The "sunk" ground was about 5 feet long by 2 1/2 or 3 feet wide. The hole appeared to be the site of a camp fire. A foot at each end of the depression was clear of ashes. There were signs of several other fires around the place. The date I was speaking of was the 23rd May, 1894. Could not say when the fires had been burning. Peters who had a spade, was instructed to skim off the earth on the top of the depression. As he had taken out a few spadefulls I noticed some tent rings, we then noticed a vein of white substance, similar to lime. Peters said it looks like burnt bone, I took an oil sheet and put it beside the hole. Peters placed a spadefull or two out of the hole on to the sheet. In the centre of the hole we raised 2 or 3 spadefulls of the white substance. I broke up one spadefull and examined it. It contained some buttons (here produced) apparently over-shirt buttons, and buckles. The clasp of a purse or tobacco pouch all the articles produced, except the oil stone and suspender buckle, were found in the matter taken from the hole. I collected one bucket full of these chunks of white substance and brought it back to Edmonton. It was handed over to the Sergeant in charge, after which it was given to Dr. McInnis for examination. The oil stone was handed to me by either Ford or Peters at the moment of finding. The suspender buckle was also handed to me at the hole. We examined, I should say, 5 buckets full of the white substance. The centre of the hole contained at the bottom most of the white substance. Peters dug down the whole length of the hole through the white substance to the earth and found charred remains of three sticks of wood lying lengthwise in the hole. I examined all the white substance except what I brought up in the pail. Ford or Peters found two wooden attachments or geyt tightners for a tent. After the arrest on the 31st May by Inspector Snyder, I handed cuffed and searched the prisoner and the articles found to Inspector Snyder. These consisted of a note book, a purse and a ring. We camped at Wetaakiwin for the night. I asked the prisoner how far down the river he had been. He told me he had parted with Steve at Fort Saskatchewan, having left him camped in a tent. Inspector Snyder took the prisoner by train. The prisoner talked repeatedly, wondering at his arrest. From information, on my return to Edmonton, I asked Williams if he had ever got any presents from Steve. He replied that he had not. I asked him if he had not received a watch. He said no. A ring? No. I omitted to state that I found four or five small pieces of solid bone. These were put in the parcel along with the white stuff and were finally handed to Dr. McInnis.
Cross-examined by A. Prince. From information received from Peters I was induced to go to the place where I made the search. We dug all the places where there were appearances of old fires. The white substance was about one foot from the surface. The depth to the solid ground was about two and one-half feet. I worked at intervals on this case since March 25th. I did not ask Steve if he had bought anything from Steve.
At the hour of going to press there were several witnesses to be called. Detailed account of examination in next issue.

Free Press: During his dairying lecture at Brandon, and while giving practical demonstration regarding the making of butter, Inspector Ruddle explained it as the process advanced, saying in an injectory sort of way, that last year he had charge of three dairy stations in eastern Canada, and the product of the three, 40,000 pounds, were shipped to British Columbia, right past the doors of Manitoba. Some of this was made from milk taken from farms that realized worth \$100 an acre. The butter realized 24 1/2 to 25 cents per pound, and the same thing will be done again this summer. Cost of placing butter upon the B.C. market, he said, was 1 cent per pound extra. Just here some one remarked that the freight here would be higher from Brandon. Mr. Ruddle said he could not understand that, but Mr. Scott said the rate was a special one in Manitoba, and when shipped in tubs and ice butter was only \$1.95 per 100 pounds. Mr. Wagon said it was only fair to the C. P. R. that it should be known they were disposed to foster this trade by such a low rate. Packing butter in neat packages, put up in jute sacks, so as to keep the outside clean, was often the means of a cent or two more per pound for the butter.
Ninety-five miles of Northern Pacific tracks are under water, and Great Northern trains are delayed by a washout.

METEOROLOGICAL.

The following temperatures are reported from the Dominion government observatory, Edmonton, for the dates given:

	Max.	Min.
Thursday, 7,	75	54
Friday, 8,	70	54
Saturday, 9,	66	45
Sunday, 10,	61	43
Monday, 11,		40

Barometer reduced to sea level 29.890.
Rainfall 1.45 of an inches.

EDMONTON BULLETIN, JUNE 11TH, 1894.

EDMONTON DISTRICT.
J. J. Buswell, Oakley, U. S. A., has
written to the Land Department of the
Canadian Pacific Railway Company for
information regarding the Edmonton
district. In order that these items re-
lating particularly to local matters
might be more definitely dealt with,
the Land Commissioner has forwarded
the letter to the "BULLETIN" for reply.
Following is the list of questions asked:

1. Would like to know the altitude
of the Edmonton district.
2. Amount of rain fall including
snow and rain.
3. The maximum of heat, mini-
mum of cold.
4. Average depth of wells
5. Proportion of prairie and woodland
6. Frosts. How early do they occur
and how late in the spring.
7. Price of horses 1000 to 1200,
native.
8. Price of cattle, cows, hogs and
chickens.
9. Price of implements and ma-
chinery.
10. Prices of wheat, rye, oats, barley,
potatoes, eggs, butter, and hay.
11. Price of registered draught and
road stallion.
12. What accommodation in hard-
ware business.
13. Wages and demand for labor.
14. Charge for breaking and plough-
ing.

The answers are given in the order
and with the same number as the ques-
tions.

1. The altitude of Edmonton is
about 2400 feet above sea level.
2. The yearly rainfall ranges from 6
to 20 inches exclusive of snow fall in
winter.
3. The maximum of temperature in
summer is ordinarily about 85, though
90 may be touched once or twice in the
season. The minimum in winter is
50 below zero, on a few occasions it has
been lower. It seldom, however, ex-
ceeds 50 below and then only for a day
or so. The extreme cold generally
occurs in January and February.
4. Average depth of wells is about 20
feet.
5. About 60 per cent of the country
is prairie. The country is heavily
wooded in some parts, in others lightly
wooded, in other parts beautiful grassy
plain. The surface gently undulating,
except where broken by the Beaver
Hills or by the deep valley of the Sas-
katchewan or by the smaller valley of
the Sturgeon.
6. Spring frosts are not as a rule
hurtful, merely checking the growth
which, owing to the richness of the soil,
is apt to be too rank. Crops here as
elsewhere sometimes suffer from sum-
mer frosts, but chiefly in low lying lo-
calities and through careless farming.
7. Broken native horses of from 1000
to 1200 lbs. are worth \$75 to \$100.
8. Dressed beef is worth 5c per lb. to
the farmer. Cows from \$25 to \$40.
Pork 4c per lb. live weight. Chickens
\$1 per pair, ordinary breeds.
9. Binders cost \$175.00; seeders
\$80.00; breaking plough \$20.00; stub-
ble plough \$18.00; Harrows, 60 teeth,
\$15.00; waggon \$75.00 to \$80.00;
mowers \$65.00; rake \$30.00.
10. Produce. Wheat 40c to 50c a
bushel, oats 25c to 30c, barley not
much in demand but good maling bar-
ley will soon be called for, as two brew-
eries are about ready to commence op-
erations; rye, no market yet; potatoes 25c
per bushel in the fall, 50c in the spring,
generally in good demand for shipment
before setting in of cold weather. British
Columbia is the market for our
surplus oats and beef. Southern Al-
berta and interior of British Columbia
for potatoes. Eggs 20c to 30c a dozen,
butter 20c to 30c a pound, hay \$5.00 a
ton delivered in town.
11. Registered draught or road stallion
of good pedigree is worth about \$600.
This is good property in a country such
as this where there are so few high
class horses.
12. As there are two well equipped
hardware stores in Edmonton as well as

two others in South Edmonton, there
can be no inducement offered in this
direction.

13. This is not a desirable locality
for persons seeking employment, as
there are no large investments of capi-
tal, labor is employed on a small scale.
The supply already exceeds the demand
and wages are low; a steady man, who
desires to own a farm and a home, can
do so with a small capital backed up
with industry and perseverance, and in
a short time be fairly well off. If work-
ing for wages is the only object, a man
could do better in other places than he
could here.

14. Breaking \$3.00 an acre and
ploughing \$1.50.

The Edmonton district is especially
adapted to mixed farming. Sheep do
well in small flocks, though owing to
the deep black soil and rank vegetation
it might not be considered, by some, the
ideal country for sheep. Wheat grows
to perfection and yields from 20 to 40
bushels per acre; the weight frequently
runs over 60 to the bushel. Oats have
yielded over 100 bushels to the acre; 60
would be considered a very ordinary
yield.

At the Winnipeg agricultural exhibi-
tion in 1891, the Edmonton district,
against Manitoba and the Northwest,
carried off the first prize for grain in the
straw, not less than 10 varieties, and
not less than half a sheaf of each varie-
ty; also first prize for native grasses,
not less than 10 varieties. In 1892
the exhibition was held in July, too
early to exhibit grain in the straw, Ed-
monton again took first prize for native
grasses. In both cases this was ac-
complished in the face of the keenest
competition.

Three of the English delegates con-
ducted through the Northwest were in-
terviewed in Montreal by the Gazette.

They all preferred the Northwest to
other parts of Canada, and their first
choice being for Edmonton, where there
is abundance of good land, rich soil,
plenty of hay, wood, water and coal,
rolling ground and level plains, in fact,
as said Mr. J. T. Franklin of Notting-
hamshire, one of the delegates here re-
ferred to, a beautiful country.

FLOODS IN BRITISH COLUMBIA.

VANCOUVER, June 4.—Reports have
reached here that five bridges at Three
Forks are down and the miners flooded out.
At Revelstoke the railway wharf is under
water and the rails cannot be reached to
repair the breaks. The Revelstoke and
Arrow Lake branch has suffered six wash-
outs and is impassable. At Twin Butte
three washouts have been repaired. At
Griffin Lake three landslides obstruct the
track, the combined length of which is half
a mile. At Craiglatch the bridge is swept
away and the water five feet deep washing
over sixty feet of track. At these breaks
alone the C.P.R. have 1,000 men employed.
When the last train left the men had been
working five days and nights without sleep,
and all up to their waists in water. The
fine suspension wagon road bridge is washed
away, and several of the most valuable
farms in the country are destroyed. At
Yale Canon the sight is terribly grand, the
water being churned to milky whiteness in
the mad rush through the narrow passage.
All Indian ranches are swept away. The
water is twelve inches above the floods of
1882. At Marie island the river is running
across the track half a mile wide and six
feet deep. All farms between Marie island
and Chilliwack are inundated. At Sumas
all farms in the district are flooded out.
The track between Wharf Rock and Cat's
Landing will take six weeks to repair. At
Golden the floods on the Columbia have
stopped railway traffic.

Latest reports from Westminster are to
the effect that the Fraser river continues to
increase in volume and is eating into the
dykes and railway embankment. The river
has risen three feet in the past twenty-four
hours, and is still rising. The track is
washed away at Warren Rock, and rail pas-
sengers are brought by boat direct from
Raby Creek to Westminster. There is a
good deal of suffering in the city and pro-
visions are scarce. The meat supply will
not last two days. The dam at Hope
Slough has broken away as well as the dyke
and all farmers in that vicinity have lost
everything. A few more inches and Lulu
island and Pitt meadow, including 60,000
acres of the finest lands in the province, will
disappear.

The water has risen six inches at Mission
and eight inches at Langley. Both towns
are completely under water, and the greatest
suffering prevails. At Kootenay the mines
are flooded out, and hundreds of thousands
of dollars' worth of machinery is ruined.
The damage to crops and loss of cattle
at Chilliwack amounts to \$150,000. At
Matsqui the mountains are the only things
in sight. At Hatzic people are sailing into
the open doors of their homes in boats.
At Guesnel fifteen inches of snow is com-
ing down the mountain. Cattle have been
found nearly dead climbing the mountains.
Pitt Meadow dyke has collapsed, flooding
40,000 acres of farms. All dykes in the
valley are now down.

Hawaii and Great Britain are racing for
an island for the Pacific cable.
Ninety-five miles of Northern Pacific
tracks are under water, and Great Northern
trains are delayed by a washout.

NORTH-WEST TERRITORIES
TO-WIT:

By virtue of a Writ of Execution, issued out of
the Supreme Court of the North-West Territories
Judicial District of North Alberta, at the suit of St.
George Jellett, and to me directed against the Lands
of the Edmonton and Saskatchewan Land Company,
Limited.

I have seized and taken into Execution the follow-
ing lands, namely:

The north west 1/4 of section No. 31, and south
west quarter section 33, T. 54, R. 24.

The south half of north east quarter of section No.
20, T. 53, R. 23.

The south west quarter of section No. 20, T. 53,
R. 23.

The north west quarter of section No. 9, and north
west quarter section 17, and the south west quarter No.
35, T. 53, R. 23.

The north west quarter of section No. 27, T. 54, R. 24.

The west half of section No. 19, T. 53, R. 24.

The north half and south east quarter section No.
19, T. 54, R. 23.

The north west quarter section No. 35, T. 54, R. 23

All west of 4th meridian.

Which I shall expose for sale on Tuesday the 24th
day of July 1894, at Sheriff's Office Edmonton at the
hour of 2 o'clock, P. M.

SHERIFF'S OFFICE,
Edmonton, April 19th 1894.

P.S.—Also a number of good teams and saddle
horses (mares or geldings) for sale, or will trade the
cattle.

A PLEA FOR DAIRYING.

Prof. Robertson began his lecture the other evening before the Winnipeg Board of trade by stating that his object was to interest the people in the policy of the department with which he is connected, which was pointed towards the improvement of the conditions of life in Manitoba. He found in all parts of Canada, a feeling of hostility between people in the country and those living in towns, which would be removed if the latter would take an interest in the best methods of production and study the farmers' position. If the people of Winnipeg would take a real, deep-seated interest in agriculture in Manitoba, they had powers of clear thought and strong speech to guide farmers into better practices. Agriculture and commerce always went hand in hand. In this province there were sources of wealth which were not half recognized, but which, if recognized, would yield very much to the prosperity of the people. There were bright skies and sunshine which were favorable to the growing of sunflowers. In Russia people with crude methods were making money out of sunflower oil. He ventured the assertion that if the people of Manitoba would take hold of this industry the value of the exportation in ten years would be greater than that of the wheat export. The sun had not been recognized as a source of wealth as it might be and would be. He was not finding fault with the energy of the people, but they had not managed their business well. Management was the secret of success of all callings. He had once heard Gen. Grant make a stirring speech of three minutes, and sit down covered with confusion; after which Roscoe Conkling gave a magnificent oration. The former could manage men, but the latter fell into disfavor, because he could only talk. Farmers would gain high wages for their management by making butter through the winter and cheese during the summer and by having swine to sell during the spring. In three years his department had established in Ontario twenty-three different factories where butter was made all last winter, and the people managed to have butter to sell at twenty-seven cents a pound. He told of an owner of a 250 acre farm who had last year made \$2,300 in cash from his cows and \$700 from swine. He had his cows give milk ten months in the year; they averaged 853 a head. He built a silo and fed his forty-five cows on Indian corn.

Managing the market was also of importance. Over the whole Dominion the prices of grain had gone down in the last ten years, thirty to forty per cent. The exchange value of grain had not gone down so much. Men could grow wheat at less cost now, and by improved milling machinery they could make more bread; this was intrinsic value. Then there was the value for exchange, for cloth, machinery, groceries and furniture. The exchange value for these things had not fallen so much as the price per bushel had fallen. The actual cash value of butter and cheese had not gone down, at all, and the exchange value had gone up a great deal. The only safe kind of agriculture for Manitoba in the time to come was to produce butter, cheese and bacon; then wheat as a side issue, and not the main object of farming.

Muscular strength and fertile soil were required in primitive farming; the only economy was that which made people do without things. The people of Ontario used to do without furniture, clothing, groceries, machinery, etc., and then they could make money and save a little. Now people were not willing to put up with an absence of comforts. The people of Manitoba persisted in trying to make money by grain growing; still they would not do without things. The people of Russia and India were building railways and growing grain, and their grain was going into London at the same time as ours. The people here had three times the amount of clothing they had. As long as people grew wheat and do without things, they would fetch everybody else down to their level or make them go out of wheat growing. Competition does not always depress prices. We can protect ourselves against low prices by sending to market a class of products that will always bring high prices, namely animals and their products, such as butter, cheese and bacon; and then we can raise wheat on less acre. He did not say whether or not the freight charges were too high; but any company could carry a tub of butter to Liverpool for no more wear and tear, and no more wages than it would require to carry a bushel of wheat. While it would claim half the value of the wheat, it would claim no more than one-tenth the value of the tub of butter for freight. Farmers then, can save themselves from losing so much into the hands of the transportation companies. It is economy to concentrate anything that has to be carried thousands of miles. We could not afford to carry cordwood from Ontario. Certain classes of products cannot be carried too far, because of the expense of moving; it should be considered whether wheat is one of these, and whether it is not better to have wheat turned into bacon. An experiment with two carloads of swine showed that the poorest class of rough, heavy swine added nine pounds of bacon for every bushel of frozen wheat. With well bred animals in a comfortable place there was a little over fifteen pounds increase per bushel. The price of swine, live weight, had been over five cents a pound for the last five years. At that average price, twenty-three cents a bushel was realized for frozen wheat after allowing five cents for shrinkage on the swine.

How can dairy farming be introduced here with the most success? The soil Prof. Robertson supposed, was as fertile as any on the earth. On the Brandon and Indian Head experimental farms it had been observed that when land had been cropped a few years, the grain ripened a few days later; and where a very light top dressing of manure was used it ripened a few days earlier. One ton of wheat would carry more of the elements of fertility out of Manitoba than 400 tons of butter. The proportion of exhaustion from bacon, cheese and beef were rather higher, but none of them were within a quarter of as much as from wheat, oats or barley.

The effect on population was discussed by the lecturer. He said a grain farm would not employ as many people as a dairy farm; and the latter would give employment for a longer period. Farmers

in Manitoba who are not employed profitably at productive work for more than three months in the year could be profitably employed ten months in dairy farming. In 1886 the value of the exports of cheese from Canada was \$754,000. After seven years of hard pushing of the business the value had run to \$13,407,000, and the price was also a good deal higher last year. The market was not likely to be appreciably affected by Manitoba for the next ten years. Reasons for considering the business safe were that cheese is the cheapest food product, a pound being about two and a half pounds of beef for nourishment. In England people buy cheese as the cheapest food. They are continually taking more concentrated food therefore it will pay farmers to produce the class of food for which the demand is increasing. We are keen competitors with the United States. In 1884 the United States exported \$16,000,000 worth of cheese; last year only about \$7,000,000 worth, leaving us more market for ours. Since 1890 the exports of butter have been quadrupled. Discussing the question, how to go about the introduction of the business into this province, Prof. Robertson said that since 1890 travelling inspectors had been sent through the province to instruct farmers and farmers' wives more with a view of stirring up interest than giving information that would be of permanent service. All over the province they had found ill-concealed indifference, small audiences, and almost no encouragement, until the conclusion was reached two years ago, to put the work into Quebec and the maritime provinces and wait until the wheat fever here should wear off. Accordingly last year he was instructed to confine the work in Manitoba to instruction of cheese makers. The plan this year is to have two travelling dairies spend their whole time in Manitoba and the Northwest Territories from now till harvest time. It is hoped to cover fifty-five or sixty places. The object is to give people who must make butter on their farms practical instruction how to do it in the best way; also to make a more detailed report on the pasturage conditions, fodder-growing qualities of the soil and water privileges, so as to know where it would be best to establish cheese factories. Jointed to this work it was intended to start dairy stations. In 1891 the farmers of Prince Edward Island, who had been growing no corn were induced to plant similes, the government giving one worth five cents to every farmer to plant a quarter of an acre. This year 5,000 acres of corn were grown. A number of farmers were with difficulty induced to put up a small building for a cheese factory, the government putting in a press in each and charging 25c per pound for doing the business and giving back the proceeds from the sale of the cheese. Thousands of farmers visited the factory in one summer. Half of the cheese was sent to England and sold at the same price as the best Ontario cheese. Last season eleven companies of farmers built cheese factories, paid for them and equipped them themselves and asked the department to run them, which was done for 1 1/2 cents per pound. The revenue was \$48,000 for the sales of cheese. This season there are sixteen factories having a revenue of about \$100,000; nearly all had paid their own way this year. This had been done in three years. A creamery thoroughly well equipped would cost \$3,000, that is \$60 per farm for fifty farmers. It would pay farmers to do without extra machinery or sell it to get this extra equipment. By having centrifugal separators in use, farmers would get one-fifth more butter and higher prices. By giving a little better care to cattle through the winter, building soil stables and growing a few more oats, they would get far more milk. By keeping swine they could find an outlet for their barley and inferior wheat. It can never pay to carry live cattle to England to be slaughtered there for beef. The best thing is to have them killed in Canada and save the shrinkage and cost of transportation. The lecturer suggested the consideration of whether a good packing house could not be had in Winnipeg; also a packing house for bacon. Either Brandon or Winnipeg, he said, would be a capital point. The department had consented to spend the most of the time, for the next three years, on the maritime provinces and the Northwest. He hoped to stay and see creameries started, and abattoirs and packing houses established. The more stock kept, the more grain of good quality could be raised.

Managing the market was also of importance. Over the whole Dominion the prices of grain had gone down in the last ten years, thirty to forty per cent. The exchange value of grain had not gone down so much. Men could grow wheat at less cost now, and by improved milling machinery they could make more bread; this was intrinsic value. Then there was the value for exchange, for cloth, machinery, groceries and furniture. The exchange value for these things had not fallen so much as the price per bushel had fallen. The actual cash value of butter and cheese had not gone down, at all, and the exchange value had gone up a great deal. The only safe kind of agriculture for Manitoba in the time to come was to produce butter, cheese and bacon; then wheat as a side issue, and not the main object of farming.

THE EXCURSION.

Though Thursday morning was not very inviting, numerous rigs crowded with passengers on pleasure bent, were seen driving towards the steamboat landing. Towards 10 o'clock some 150 had assembled and boarded the Northwest for a trip up the Saskatchewan. A start was made and after a run of about 25 miles, which is some 5 miles below Stony Rapid, the boat tied up, all the passengers debarked and enjoyed themselves, some picking ferns, wild flowers, etc. At 4.30 a start down stream was made, the boat again putting ashore at a point below Big Island, here the passengers went ashore, the ladies to pick more ferns and flowers, the men to indulge in the many games of tug of war and rowing. A start for home was made at 5.30 and the Northwest reach the landing soon after eight o'clock, without mishap, ending one of the most pleasant outings ever experienced by the people of Edmonton. Throughout the trip everyone was delighted with the scenery the accommodation and the management. One of the principal features of the trip, however, was the presence of the Edmonton fire brigade band, who furnished good music from start to finish. The scenery along the river is reported to be grand and almost indescribable. A number of rafts were seen slowly floating down the current, and a few camps of miners were passed. To Captain Duggall and Mr. McGinn, the purser, are due the thanks of the party for their endeavor to make everything as comfortable and enjoyable as possible. We are pleased to be able to state that the promoters of the trip, Messrs W. G. Ibbotson, F. Mariaggi and T. G. Lauder, did not lose on this hurriedly arranged excursion, the receipts being adequate to defray expenses.

LEDUC LISTINGS.

A copious rain fell last night accompanied by vivid lightning and startling thunder. Everything looks bright and fresh this morning, and the Leducans are jubilant over the prospect for the future.

The public school is now in full swing under the able management of D. J. Matheson from Dewdney.

N. B. Heath has turned his attention to farming and under the manipulation of science he intends to make a success. We no longer see the white sails of his pleasure yacht skimming over the blue waters of Lake Telford.

J. L. Houson has a gang on completing the building which he started last fall on Main Street.

George Columis is a substantial dwelling at the foot of Freeman Avenue.

D. Wilkinson has almost recovered from the injuries he received from a broncho two weeks ago.

Regarding action of Knox and Howard against R. T. Telford. It was not only one horse but the whole band that broke into Telford's garden. As it was proven that Telford did not hold the horse illegally for the damage committed, it must have been legally, and I fail to see why the police should have taken away the horse from Telford until the damage was paid.

FORT SASKATCHEWAN, ALBERTA.

At a meeting held last night (Wednesday) it was decided to hold the sports on Friday the 29th of June, instead of Monday the 2nd of July, as Edmonton holds theirs on the latter date, a large contingent of horses and sports are expected from Edmonton.

Mr. Oliver, M. L. A. addressed a large meeting of the electors in Bremner's Hall. After the above meeting, which was well received, adjourned, he dealt with the work done by the assembly, and in his usual masterly way settled down to a friendly chat with those present, about road improvements, old trails, etc. At the close a very hearty vote of thanks was moved by J. F. Forbes and seconded by F. F. Tims. Mr. Oliver expressed himself as surprised to see the improvements and progress the town of Fort Saskatchewan had made.

A Social and "Tableaux Vivant," in aid of the new Presbyterian church, will be held in McDonalds Hall, Fort Saskatchewan, on Friday evening June 15th. An excellent programme is being arranged. Besides the local talent a number of Edmonton's accomplished ladies and gentlemen will take part.

GENERAL NEWS.

A fund for the benefit of the British Columbia flood sufferers is being collected in Toronto.

A proclamation has been issued forbidding the sale of ammunition in certain portions of the far north.

The projected Canadian-Australian cable will be 5,244 miles long, and will cost \$7,000,000 if it does not touch the Fiji islands or New Zealand.

Bradstreet's reports trade dull and unsatisfactory in Toronto. In Montreal the volume of trade for May has declined 10 per cent. Prices continue to recede and the general outlook is not encouraging.

Free Press: Col. J. F. Macleod, C.M.G., the judge of Macleod judicial district, is to be removed to Calgary. The other officers of the court will still remain in Macleod,

but the residence of the judge will be Calgary. There is much regret felt at the removal of His Honor, who for nearly a quarter of a century has resided in Macleod and district, and after whom the town is named.

Free Press: The Winnipeg delegates to the Masonic Grand Lodge to be held at Banff next week will leave here on Monday, the 11th inst., by the regular C. P. R. train and will be joined by delegates from intermediate points en route. The contingent from this city will number about twenty, and by the time Banff is reached it is expected that the party will number 175 persons. Four extra sleeping cars will be attached to the train for the accommodation of delegates, members of the Masonic order and their families. The diagrams for the sleepers are now ready. It is thought that the hotel accommodation at Banff will be limited, as a party of tourists from the Orient will probably arrive there at the same time as the Masonic brethren. The meeting will occupy two days and after adjournment quite a number of the brethren will visit the coast cities. The grand master of British Columbia will attend the meeting.

TENDERS.

Will be received by the undersigned until noon of the 13th June next, for the purchase of a Tent and Taylor Safe, the property of the municipality. Can be seen at the office of Mayor McCauley. Particulars as to terms from.

A. G. RANDALL, Town Clerk.

NOTICE.

Court of Revision

The Court of Revision for the hearing of appeals against the assessment of 1894, will sit at the Council Chamber on Wednesday, the 27th June, 1894, at the hour of 8 o'clock, p.m.

A. G. RANDALL, Clerk.

CREDIT SALE!

H. B. Co.

The Reasons Why

It will pay you to buy from the H. B. Co.'y.

Because our Boots and Shoes are manufactured specially for us by the best Canadian and American makers.

Because at the prices we sell them they offer the best value for your money.

Because for men's wear they are the cheapest and most durable.

Because for ladies' wear we show a more complete and varied stock than any house in town.

Because for Misses, Boys and Children our stock is complete.

Because for all we offer you a choice, whether you aim at appearance, ease or durability, or a combination of all these qualities.

We are offering special lines of Bicycle and Tennis Shoes.

Each change in weather as the warm season approaches brings with it the necessity for a change of headwear. Just now we want to sell you

Straw Hats.

Gentlemen—Before purchasing elsewhere call in and price our Straws. They are this season's newest shapes, and like our Felts are the lowest in price offered here. Ladies—We have the daintiest and prettiest shapes in Sailors' and Fancy Straws at marvelously low prices. The same may be said of our Girls' and Child's Sailor Straws, which for value defy competition.

Cowboy Hats.

We have just opened our J. B. Stetson No. 1 quality Men's Cowboy Hats. These Hats wear well and keep their shape. Don't be deceived with imitations.

Athletes and Cyclists

Buy your Suits, Caps, Jerseys, Shirts, Belts and Stockings, etc. from us and save your money by doing so.

Dress Goods.

There are still a few of those costume lengths left. They are the latest, and if you require a dress, one can be secured very cheaply by purchasing from us.

Soon the cry will be "Oh, this sultry hot day." Be ready for such days and have one of those light beautiful dresses from our stock of all wool Delaines at 25cts. a yard, cotton Pongees, you can scarcely tell when made from silk, at 17cts. a yard. Zephyrs, Scotch Gingham, Lawns in colors and Cashmerettes in black grounds, with the sweetest patterns in Sprays at 17c. a yard.

These goods make ideal dresses, beautiful in appearance and economical.

THE Hudson's Bay Co.

(Incorporated 1870.)
